REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 11, while the prior art discloses using a faraday rotator made of a garnet comprising Tb, Al, O and at least one of Pr and Ce in combination with other elements (See Ross US 4,563,236 with iron; Robinson US 3,484,152 with silicon, magnesium and antimony; and Young et al. US 3,420,601 with boron), using the recited combination of elements in a magnetic bubble domain system (O'Donnell et al. US 3,827,036) and using the recited combination in a light emitting garnet phosphor (See Kummer et al. US 2005/0145868); the prior art however, does not disclose a faraday rotator made of paramagnetic material consisting essentially of an oxide of Tb, Al and at least one of Pr and Ce, as recited in the claims and in combination with the other features of the claims. The remaining claims, based on their dependency, are allowed for the same reasons therefor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
